

Pleus:

a model with several sectors
(elaborating the departmental returns?)

1. in which the economy is divided
according to e.g. price sections,
or protectedness, etc

To take account of
feedback reactions

Or, specifically
treat structural problems
by means of such multi-
sector model!

a special treatment of the simultaneous

2. price + quantity problem

by having 2 sectors, a flex price + a fix price.

3. growth model, starting from my Warwick
lectures.

Measurement of technology; Criticism is
Warwick seminar

shall write up the problem.
