that is
a temporal
hierarchy in time!

Newman Conference

My idea of a dynamic system
with each technology (process)
being possible only on condition
that certain others have been used before
(A hierarchy in time!) and a
certain time must elapse, and as
certain production be achieved, before
the next process can be used (learning).

Such a system of course the Newman system
will not exist, but he studies
the underlying structure (the path;
the decomposition) instead of the whole
to growth).

LAST: My objection to the treatment ~~was~~
prof. -- scale.

Question of Potential Key - Market Process
in production in economies.
Large scale economies?

MONROE,
