

This should give us the
mergers!

Just answer, or example;

0 = firms ; but the age modified?
Merge has to account
the new concern arising from merge
must certainly not be able to be going

Supplied one organization, discrete dist. of skills/strata

Income in relation to skill/strata

strata of skills +
experience

assuming a discrete distribution of

organizations necessary to make

(in terms of manpower) its work,

take care ensure that with increasing size
the top scale is pushed out, i.e.
