

24.3.

Was it Fodor's model?

Starting from Technical progress,  
following my "objective" description  
of evolution as increased  
variety - (more information!)

Is there anything else?

Since the question is nowadays whether  
there are different ways - - - -

(Well in fact you can if you wish see  
different ways in organic evolution -  
say the insects and the vertebrates, for example.
