

in what sense
 very soon, it
 led to an effect like I
 described in the 8th -
 an increase in profit function,
 shift

With regard of profit function
 there is increased utilization
 (creator boom!)

Both effects counteracted in the course
 of diffusion when competitive pressure
 (loss of monopolistic position of innovator)
 leads to downward pressure on profit share.

the effect of innov. gets its force only
 by the feed-back

Analogies? of positive feed-back

Synergistic effect
